

EXECUTIVE SUMMARY

VIVIFY Technology offers a wide array of power and conditioning products to produce hydrogen based energy sources and contamination cleaning solutions.

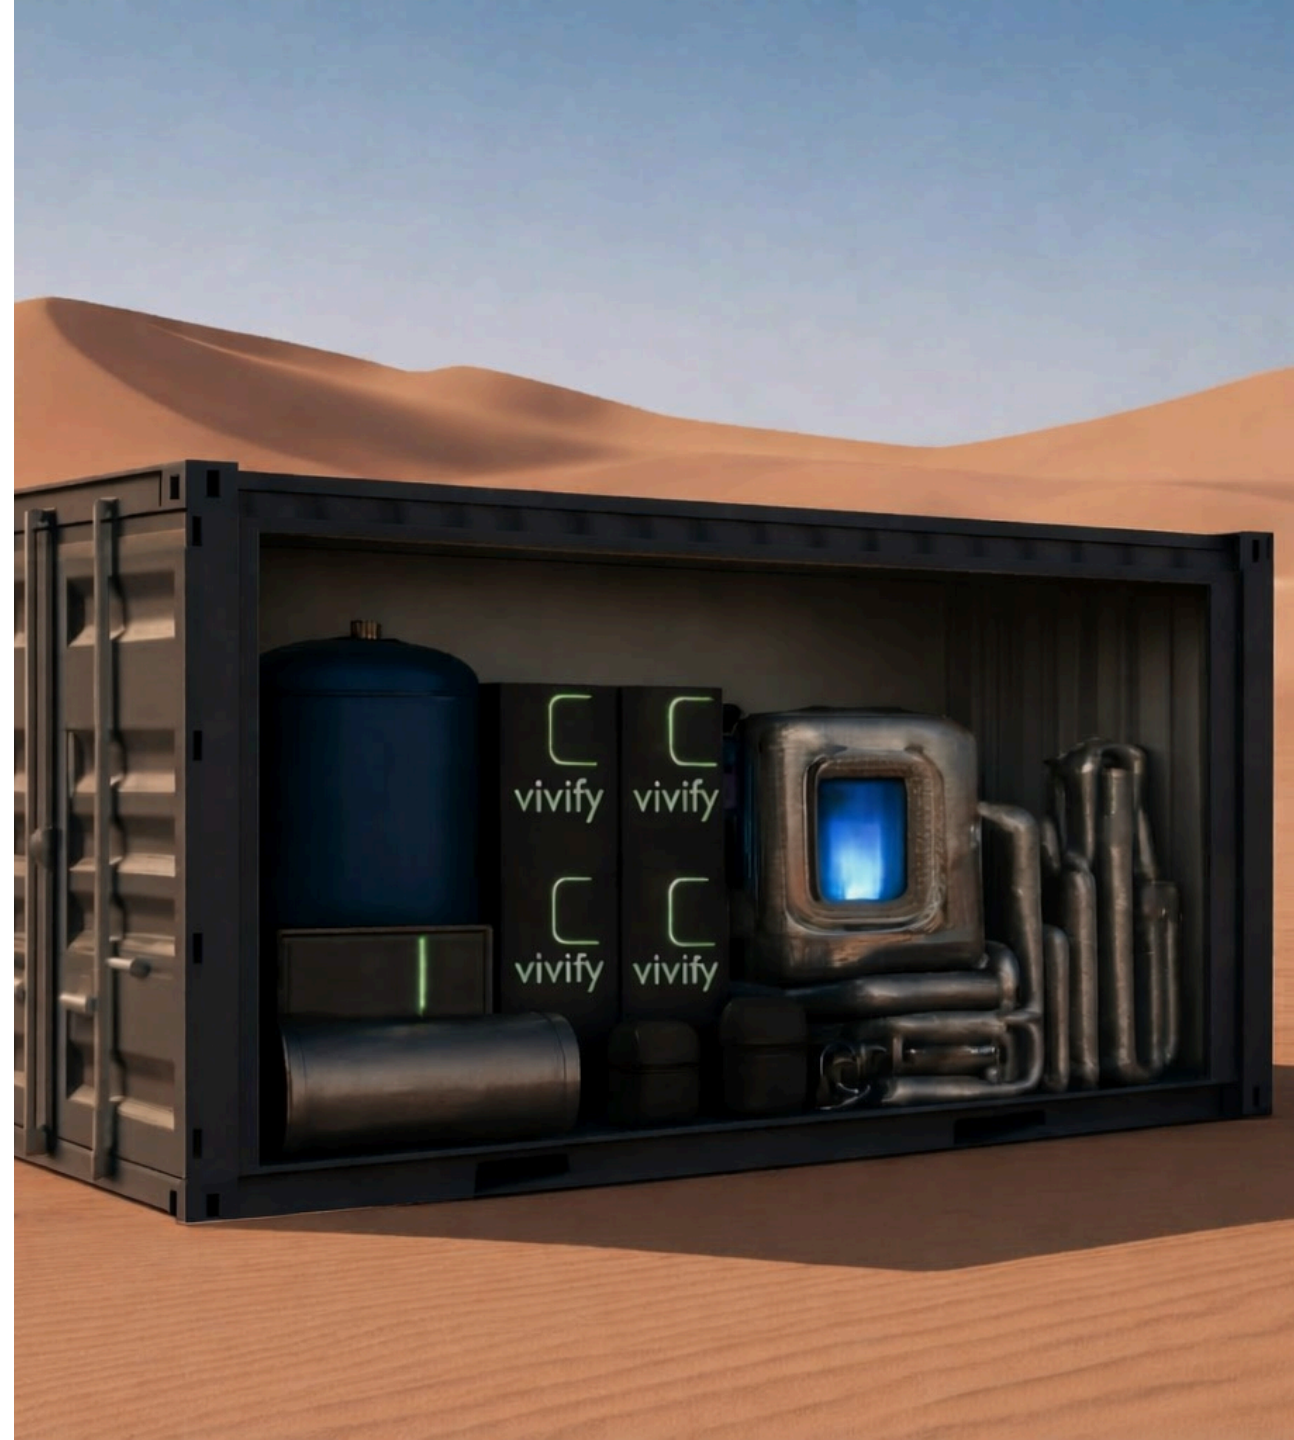

VIVIFY Flying Pig

1MW Scalable Containerized Solution

Featuring the core elements of the flagship HOG, the Flying Pig delivers 1MW of power using micro hydro turbines and Pulsar technology within a scalable containerized architecture. Designed for quick assembly and connection points to be deployed in remote locations. Powered by a water input source this modular system is capable of scaling when additional modules are applied

SYSTEM ADVANTAGES

- ⚡ Scalable power
- 💧 Water based input
- 💰 Low maintenance costs
- 🏠 Self contained housing

Technical Specifications

VIVIFY FLYING PIG 1MW

SYSTEM COMPONENTS

POWER GENERATION CORE

✓ Micro Hydro Turbine	1 Unit
✓ Micro Steam Turbine	1 Unit
✓ Small Scale Combustion Chamber	1 Unit
✓ Small Scale Heat Exchange Chamber	1 Unit
✓ Pulsars	8 Units

INFRASTRUCTURE & INTEGRATION

☰ Water Tank Storage	500 Gallons
💧 Water Filtration System Filtration can be ported for other uses once cleaned	1 Unit
⚡ Primary Transformers For power distribution and closed loop power sources	2 Units
🔌 Coupling System Pre-installed sensors & quick-connect points	

PRICING

\$ Cost Per Unit	\$2,500,000
------------------	-------------

MAINTENANCE PROFILE

Maintenance Item	Rate / Frequency	Cost
Carbon Element	Yearly (1 Year Supply Included)	\$25k
Water Supply	5% loss per year	PERIODIC

COST OVER TIME

Diesel priced at \$4.00/gal delivered

Year	VIVIFY	Diesel Generator
Year 1	\$2.50M	\$3.05M
Year 3	\$2.55M	\$7.66M
Year 5	\$2.60M	\$12.26M

💰 \$9.8M savings vs diesel (5 years)
